

Template Design

The template design of your site controls the look and feel of every page on your site- and any new pages you may add. Once your template is created you do not have to worry about making new pages look the same as old ones, the template automatically does this for you.

For an example of just how dramatically a redesigned template can impact your site, click on the 'Film/Video' buttons in the menu (left and above). There you will see this site 're-skinned' with our special 'Film Section' template.

We offer two options for template design: We can design a bespoke template for you from the ground up according to your ideas and vision. We are also affiliated with the excellent Rocket Theme who specialise in template design for customers around the world. If one of their designs is suitable we can customise it for you for a low cost. View their demo templates [here](#).

Our bespoke template design costs from £450 and we charge from £200 for a Rocket Theme customisation.
