

Logo Design

Whether you are in the early stages of starting your company, or you are looking to give your brand a facelift we can create the perfect logo help your company convey your 'brand message'.

When <http://www.david-osullivan.co.uk/> design your logo they will take the time to find out what you want your brand to represent and what your customers want your brand to offer.

The first phase of our design process is to research the market you are competing in and to find other brands who are perceived to embody some of the 'key words' you have given us when describing your company. We then mock up a number of design options and present them to you for your consideration and feedback. This then results in a refined development of the design direction of your choice which goes through one more round of feedbacks and improvements before the final design is delivered as a high resolution computer file for you to use on hoardings, adverts, letterheads, your website and so forth.
