

## Recent Clients

Below is a selection of some of our recent work, please feel free to follow the links to visit the sites.

### Villa Kirlangic- Luxury Turkish Villa

A site promoting a luxury Turkish Villa in Kalkan

- Providing a link up with their existing online booking calendar and pricelist.
- Attractive atmospheric design with music and slideshows..
- Creating a back office system for staff to manage bookings, news and events.
- Text, images and slide shows to all be editable by the client without any further assistance.
  
- A contact form for customer enquiries.

To create an editable site that would be as easy for the client to us as MS word we opted to use the Adobe Contribute system.

### The Mapledurham Trust

Here we were asked to transform the Trust's business from a paper to a web based business. They required a website that would reflect the beauty and history of the Estate aswell as:

- Providing an online booking system for the estates holiday cottages.
- Dynamic pages detailing the latest News and Events on the estate.
- Creating a back office system for staff to manage bookings, news and events.
- A sophisticated customer enquiry system that would provide a database of customers.
- Enquiry specific e-mail templates and automatic system responses.

Because the client wanted the new system to mirror as closely as possible their current working practices we created a totally bespoke administration system that was totally intuitive for existing staff to use.

Andalucian Dream Rentals

**\*\*UPDATE This site has been taken over by Andalucian Dream Homes!\*\***

Andalucian Dream Rentals wanted a chic, classy and modern rather than 'typically spanish' property rentals site that would also make use of typically andalucian elements to sell Andalucia as a holiday destination. Key features are:

- Providing an online booking system for the company's current rental properties.
- Provide a back office system where staff can also book/manage rentals.
- A feedback system to track saleperson performance.
- A relational database of towns and locations of properties dynamically updating the 'where to go' section on the site.
- A simple easy to use Admin section for adding rental properties

With Panache Theatre Academy

With Panache is a Dance, singing and drama school based in London. The school has a very high standard as its entry is based on auditions but it also has a wide age range.

- We created a design that would appeal to a broad age range.
- Applicants can download an application form and the school is notified when they do.
- Pages are easily updatable by With Panache staff to promote the latest classes and news.

The Hendred Estate

The Hendred Estate is a large country estate near Oxford with around 200 rental properties on offer. The Estate required.

- An online catalogue of their rental properties only displaying upcoming vacant properties to visitors.
- A back office system allowing staff to simply add properties and to change their visibility status.
- A simple but sophisticated customer enquiry form that keeps a record of the types properties customers are interested to help staff find suitable properties for them.

- A front page featured property that can be chosen by staff to give prominence.
- Elegant countryside design.
