

Creating a web Presence

E-commerce is on the move again and with it a whole new raft of opportunities for you to interact with your clients in new and exciting ways.

At www.david-osullivan.co.uk we bring these options to you in a simple easy to understand way, to help you create the perfect site for the requirements of your business today, and in the future.

The process- its simple!

- The first and most important stage of creating your new web presence is the initial consultation. This is a free service where we visit you and discuss your aims for your site and your company generally.

- After this initial meeting we will draw up a quotation detailing exactly what we are going to do for you and the exact functions of your site. We can quote for a variety of different levels of functionality if you wish.

- After we have your go ahead and have recieved any logo's, images and content you require on the site, we make a mock-up of the site design for your approval. We can quote for multiple mock-ups if you require and the design phases can go through multiple design refinements if you wish.

- Once the design has been approved we integrate this with the applications (shopping carts etc.) you have ordered and add the content you have supplied us with to your pages.

- The site is then presented and subject to approval is made live and submitted to our extensive search engine database.

If you wish to contact us to arrange a consultation [click here](#).
